● WHY SLADE

Starts from your product

The base is always a real photo of what you sell, which is why the output still looks like your brand.

Rules set first

Colour, styling and framing are fixed before anything is generated, and every result is judged against them.

Checked by a person

Far more is generated than ships. An editor compares each frame to the real product and rejects anything that changed it.

Sized for every placement

One idea, delivered in the ratios your store listing, feed and ads each need.

Have an impossible idea? Good.
Let's see what AI can do with it.
